

Scalable Deposit Module

Optimizing Your Cash and Check Transaction

Single slot interface for cash and checks

In today's world, financial institutions are focused on improving the consumer experience. With the development of the Scalable Deposit Module from NCR, it is now more convenient for a customer to do a check and cash deposit without having the need to split the cash and check, an option not available from competitor solutions in the marketplace.

Through Scalable Deposit Module (SDM) technology for NCR SelfServ ATMs, consumers can deposit both cash and checks through a single deposit slot and with a single transaction, making deposits at the ATM faster and easier for a financial institution's customers.

With SDM, a typical consumer deposit of five bank notes and two checks takes less than 60 seconds to complete. In addition, SDM improves the experience for small and medium businesses. On average, the small business owner deposits between 12-20 checks and/or 25-30 notes per transaction. SDM technology, particularly when combined with a personalized 'My favorite transaction' feature at the ATM, makes their daily deposits quick and hassle-free. Customers no longer need to stand in line for a teller, or even schedule their deposits during branch hours delivering a much more convenient service as well as real-time, online credit, that helps improve their cash flow.

SDM installed on SelfServ 32

An image of the deposited check on the receipt helps to build customer confidence for each and every transaction.

Key Benefits of Scalable Deposit Module

- Fast Media Handling = Shorter Transaction Time
- Greater Customer Convenience to Improve Your Customer's Experience
- Fast Transaction Times
- Single slot interface for cash and checks
 - o One deposit button
 - o One slot deposit
 - o One mixed bunch (software dependent)
- Intuitive to Service
 - o Visual indicators for transaction lead-through
- Improved Branch Efficiency
- Available on NCR SelfServ 30 Series

The SDM module can be retrofitted for NCR's existing SelfServ 30 series of ATMs or purchased installed in new models resulting in shorter deposit times because customers do not have to deposit bank notes into one slot and cash into another slot at an intelligent deposit ATM.

Scalable Deposit Module

The SDM module can be retrofitted for NCR's existing SelfServ 30 series of ATMs or purchased installed in new models resulting in shorter deposit times because customers do not have to deposit bank notes into one slot and cash into another slot at an intelligent deposit ATM.

NCR SelfServ 32 Interior Freestanding Full Function ATM

A full function freestanding lobby ATM. Designed with medium to high transaction usage in mind, the NCR SelfServ 32 dispenses cash as well as accepting cash and check deposits and offers a broad range of other services, such as bill payment, funds transfer, mobile phone top-up and mini-statements.

NCR SelfServ 34 Through-the-Wall Full Function ATM

An exterior through-the-wall or vestibule ATM, specifically designed for high transaction usage. It dispenses cash as well as accepting cash and check deposits and offers a broad range of other services, such as bill payment, funds transfer, mobile phone top-up and mini-statements.

NCR SelfServ 34 Drive-up Through-the-Wall Full Function

A fully weatherized exterior through-the-wall drive-up ATM specifically designed for high transaction usage. It dispenses cash as well as offering a broad range of other services delivering a complete self-service transaction set in a drive-up location.

NCR SelfServ 38

A freestanding drive-up ATM designed to cope with the severest weather conditions. It dispenses cash, offers a full set of revenue-generating services and the widest range of upgrade options available. With a compact transaction area, its large screen and shortest reach delivers the greatest consumer usability across the widest range of vehicles.

Why NCR?

Unlike our competitors, NCR offers the flexibility of technology such as the Scalable Deposit Module, and other intelligent deposit solutions, as well as traditional two-pass processing. Anyway you need it, we have a solution to suit your organization.
